

OnePlus 13 global model gets new update with Gemini Nano and camera improvements

The OnePlus 13, which began its international rollout last week, is receiving a new software update, with support for Google's Gemini Nano AI model being the biggest highlight. OnePlus 13

The update's changelog doesn't mention Gemini Nano, but Android Authority reports it brings the Android AICore app necessary to download Gemini Nano. And once it's updated from the Play Store, the OnePlus 13 starts downloading Gemini Nano when you tap the Magic Compose button in the Google Messages app.

In addition to Gemini Nano, the new software update, having firmware version CPH2655_15.0.0.402(EX01), brings some camera improvements to the OnePlus 13. You can check the complete changelog below for more details.

Communication & interconnection
