Qatar has expressed interest in hiring skilled workers from Bangladesh, particularly in the sectors of electrical work, welding, air-conditioning technology, and plumbing.

The matter was discussed during a recent joint meeting between the two countries, where increasing the number of Bangladeshi workers in Qatar received significant attention.

Bangladesh also requested Qatar to raise the number of imam and muezzin recruitments, to which Qatar responded positively.

During the meeting, Qatar also conveyed its willingness to create more employment opportunities for Bangladeshi nationals in the future.

Meanwhile, Bangladeshi applicants are currently facing difficulties due to the presence of only one Qatari visa center in the country. As a result, Dhaka has requested approval for several additional visa centers.

Officials said Qatar will discuss the matter in a joint working group meeting before making a decision.

The relevant ministry in Bangladesh also stated that steps will be taken to ensure that institutions responsible for visa processing do not harass or inconvenience applicants.
