The bodies of 20 Palestinians have been recovered from the rubble of a destroyed building in Gaza's Zeitoun area. Members of the civil defence teams recovered the bodies, according to Palestine's official news agency WAFA. The report was also published by Anadolu Agency.

According to WAFA, the 20 people were killed in Israeli strikes during the war. Civil defence teams are continuing operations to recover the bodies of people believed to have been trapped beneath buildings destroyed in the attacks.

Many people remain missing in Gaza following the Israeli strikes. Some are believed to be trapped under the rubble. Rescue teams are therefore continuing to clear debris in search of those still missing.
